

SAMURAI International Workshop 2011

March 9 and 10, 2011 @ RIKEN RIBF Conference Hall

This is an announcement for registration of "SAMURAI International Workshop 2011" which will be held on March 9 and 10, 2011 at RIKEN RIBF Conference Hall. SAMURAI is a spectrometer which is now being constructed at RIKEN RIBF. This spectrometer is characterized by the large angular- and momentum-acceptances enabling, for example, multi-particle coincidence measurements. The on-site construction started in October 2010, and commissioning experiments are to be performed in early 2012. In October 2010, we submitted a construction proposal to the PAC and this proposal was reviewed positively. We also held a workshop rather locally in November to summarize the current status of construction and also to discuss possible research subjects at SAMURAI.

Taking this opportunity, we would like to have an international workshop to discuss possible research programs as well as technical issues including detector development and construction. The "SAMURAI collaboration" so far is based on the construction teams which cover specific detectors and/or experimental devices. One of the purposes of this workshop is to extend the collaboration to more researchers who are interested in SAMURAI-based experiments and developments, in order to facilitate involvement of scientists in the world and to buildup and enrich research subjects using SAMURAI.

Those who are interested in researches using SAMURAI, please join us to discuss on this SAMURAI project. Please fill the registration form below, and send it back to the conference email address : samurai_intws2011@riken.jp

If you do not have a hotel reservation yet, please make a reservation from a web page of the hotels nearby:

Toyoko Inn Wako-shi Ekimae

http://www.toyoko-inn.com/e_hotel/00090/

Super Hotels Saitama, in front of Wako Station

<http://www.superhoteljapan.com/en/s-hotels/wako.html>

We look forward to your participation in this workshop.
