

Dear Colleagues,

The Nuclear Physics community of SPES, the Italian project for an advanced facility of Exotic Beams at Laboratori Nazionali di Legnaro (Italy), is organizing a school having the aim of delving into experimental techniques which are specific for experiments with Radioactive Beams.

The meeting will take place at the Laboratori Nazionali del Sud in Catania from the 8th to the 12th of November, both days included. The school is addressed to senior researchers, post-docs and PhD students who are interested in experiments with Radioactive Beams and in particular with SPES. No fee is required.

There will be four lecturers having expertise in Experimental Nuclear Physics with Radioactive Beams, each giving 4 lectures of one hour.

The lecturers will be:

- M.J.G. Borge, CSIC, Madrid, Spain;
- T. Davinson, School of Physics & Astronomy, University of Edinburgh, UK;
- D. Ratford, Oak Ridge National Laboratory (ORNL), US;
- T. Kröll, Technische Universität Darmstadt, Germany.

The regular lectures will be supplemented by seminars on topics of interest of the SPES project but also by the participants to the school who would like to discuss their research.

If necessary, some support for young people can be provided.

More information will follow.

Best regards,

Alessia Di Pietro, Danial Napoli
