

Dear colleagues,

We would like to announce the international workshop for SAMURAI on September, 2012.

SAMURAI International Workshop 2012

September 10, 2012 @ Science seminar house in Kyoto University

This is the first announcement for "SAMURAI International Collaboration Workshop 2012"

which will be held on September 10, 2012 at Kyoto University.

In March 2012, we performed a commissioning run of SAMURAI and experimentally confirmed

its performances. It was followed by a DAY-ONE campaign in May where invariant mass spectroscopy of very neutron-rich $Z=5-10$ nuclei was performed.

5 new proposals of SAMURAI experiments were approved in the 11th RIBF NP-PAC held in June.

Taking this opportunity, we would like to have an international collaboration workshop in the coming autumn,

- To discuss future experimental programs, especially ones to be proposed in the next NP-PAC,

- To share the results of commissioning and day-one experiments, and

- To arrange the near-future projects including technical issues relating to detector construction and experimental devices.

Those who are interested in SAMURAI experiments, especially who plan to submit an experimental proposal to the coming 12th NP-PAC in December 2012, are strongly encouraged to give a presentation at the workshop.

Date : September 10(Mon.), 2012

Place : Science seminar house, Kyoto University
